To: Commissioner for Patents

I am a member of the American Anti-Vivisection Society. I recently received their magazine for Winter 2007. It is all about rabbits.

I am writing to tell you that I support AAS's Request for Re-Examination of Patent No. 6,924,413. I am opposed to issuing patents on animals, such as rabbits, who are sentient individuals, not machines or, as the Patent Office states, compositions of matter.

I have been an animal activist for several years and I have sadly discovered that people who work for the government are lacking in compassion, morality and have a secular tendency. Why?

If you would like to understand more you could contact AAVS for their latest magazine.

Address: American Anti-Vivisection Society
